EDUCATION

University of Toronto
BA, History & New Media

Centennial College
Certificate, New Media Design

Acquia
Drupal Training

RECOGNITION

- Two-time presenter, U of T TechKnowFile Conference
- Graduate, Rose Patten Mentoring Program

PROFILE

Designer with 17+ years building digital experiences that balance usability, accessibility, performance, and visual craft. Experienced taking projects from concept to launch — collaborating with stakeholders, architecting component libraries, and shipping production-ready front-end solutions. Passionate about rapid prototyping and AI-assisted development.

EXPERIENCE

2021

Web Services Lead

University of Toronto

- Led front-end development for the redesigned Admissions & Student Recruitment website, building reusable components and interactive program discovery experiences.
- Mentored developers; led migration of 80+ websites from Drupal 7 to Drupal 9 and ongoing Drupal 11 upgrades.
- Applied AI-assisted workflows to accelerate prototyping, troubleshooting, and code generation.

Now

2012

Web Designer / Developer

University of Toronto

- Developed and maintained custom Drupal and WordPress websites for academic and administrative departments.
- Built responsive, accessible interfaces using HTML, CSS, SCSS, JavaScript, and Twig.
- Created reusable design patterns and front-end frameworks to improve maintainability.
- Partnered with UTSC Marketing and Communications to design and build interactive digital experiences that elevated campus storytelling and highlighted student, faculty, and community achievements.

2021

2008

Web Designer

University of Toronto

- Designed and developed websites for academic and administrative units across the university.
- Produced visual designs and interfaces focused on usability, accessibility, and content management.

2012

2007

Technical Director / Web Designer

Line of Control Web Project — Prof. Ken McDonald · Freelance Contract

- Produced large-scale print graphics for marketing campaigns & liaised with stakeholders regularly to develop a new graphic interface for the Line of Control website.
- Conducted project timeline, strategy, and flow chart.
- Integrated a JavaScript/PHP forum and Exhibit template.

2008

SELECTED PROJECTS

County Vineyards

React Application

- Designed and developed a winery discovery platform for Prince Edward County.
- Built search, filtering, favourites & interactive mapping with React and Google Maps APIs.

Admissions & Student Recruitment

University of Toronto

- Led front-end of a full redesign from concept to launch.
- Built reusable components with a focus on accessibility.

Drupal Modernization Initiative

University of Toronto — 80+ websites

- Led migration of 80+ institutional websites from Drupal 7 to Drupal 9, establishing standards, workflows, and reusable components adopted across the university.
